

The BB3 is a covert, battery-powered tag, which offers simple installation in mobile farm machinery and trailers.

Its Orion Network compatibility allows alerts to be managed by the user and tracked within their private network. The weather sealed unit has a four-year battery life, which allows for installation away from vehicle wiring looms and power supplies - batteries are replaceable. Unique web portal access to allow you to access, control, schedule and monitor all devices and alerts.

- ▶ Alerts are triggered and received via sms & email in real time
- ▶ No monthly connection fees for tracker
- ▶ Full recovery service is available for small annual fee
